## Safety Testing & Certification

ISO 9001:2015 BSCI

Have you ever let several pieces of apple grow moldy in your refrigerator, simply because you forgot it was there?

Have you ever forgotten your swimming goggles and spent several hours to find them?

Have you ever bought the same dress just because you forgot one you already have in your wardrobe?

All of these circumstances not only waste your money and time, but also our resource.

KIGI can solve the above problems for you. Reducing resource and environmental pollution, bringing convenience and comfort to users, that is what KIGI born to be.

# KIGI™ Food Storage Container Plastic & Glass

## Waste less food, Waste less money

It's suitable to store in the refrigerator, reheat in the microwave, clean in the dishwasher, bake in the oven (only glass food storage container is suitable to be used in oven), and it is with separated locks connecting lid and base.

### Reminder

“Food expires without your notice, throwing away from your kitchen will cause food waste in your daily household life.”

**KIGI™ APP will remind you to eat food before it spoils.**

Fresh

Too late

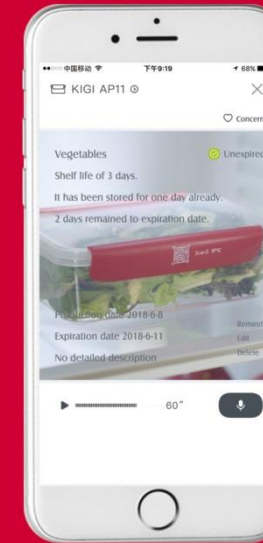

Still great but don't wait

### Food Storage Overview

“Sometimes you may waste money to purchase the same food you already have in your fridge.”

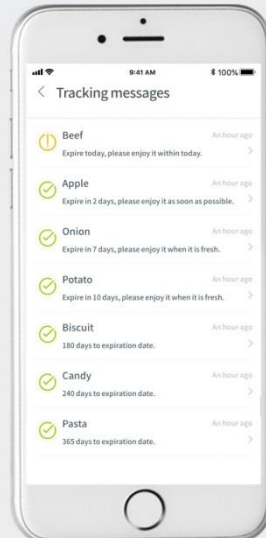

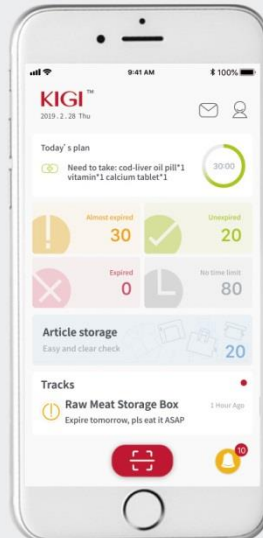

**Check KIGI™ APP and you know exactly what to buy before making a purchase plan.**

### Information Storage

“You may throw long-time-storage food due to forgetting their shelf life.”

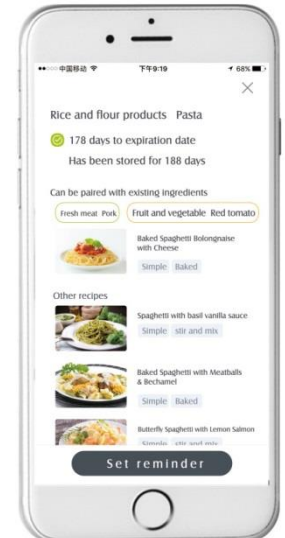

**Food's shelf life and expiration date can be recorded and checked in KIGI™ APP.**

### Recipe Search

“What to eat tonight is always a question before you step in kitchen.”

**KIGI™ APP will offer you a variety of cooking recipes based on your stored food.**

## Brand Overview

Nowadays our environment is surrounded by all kinds of household garbage, and our daily household waste holds a predominant place among them. For example, according to authority statistics, there are about 1.3 billion tons of food have been thrown away every year, which equals to half of annual food production in the world.

Based on concept of reducing resource waste and environmental pollution, we develop KIGI series products to improve our environment. KIGI is specialized in developing smart household products, all products are used in combination with APP. KIGI is dedicated to increasing household product's usage frequency to bring convenience and comfort to users, helping users cutting household waste like food waste or second purchase of the same clothes.

KIGI in your hand, household life can be simple. Join KIGI to create an environment-friendly and low-carbon life.
